MEMO

To: Customers of Status¹ COVID-19/Flu test kit
Re: Expiration dating

Dear Valued Customer,

The shelf life of the Status¹ COVID-19/Flu test kit ("Product") was initially established as 6 months due to the rapid and recent development of the Product and according to regulatory requirements, to be updated based on real-time stability testing.

The real-time stability data now support 8 months of shelf life. Going forward, for each additional month of real-time stability, an additional month will be added to the shelf life of each Lot Number as listed below. The updated shelf life will be described in additional memos and also be incorporated into the labeled expiration date as new Product lots are produced. Please retain this memo with your Product records.

Lot Number	Printed Expiration Date	Updated Expiration Date
881B11	2021-08-31	2021-10-30
881B21	2021-08-31	2021-10-30

Based on our extensive manufacturing experience and accelerated stability studies, we expect a maximum shelf life of 18-24 months to be reached and will continue to update the stability data accordingly.

We appreciate your continued support. Please contact us if you have any questions regarding this memo. E-mail: techservice@pbmc.com

Sincerely,

Young-A Kim, Ph.D.
